

2024 NEW PRODUCT

OVERVIEW

FEDERAL

FUSION[®] TIPPED

NEW PRODUCT LINE: NINE LOADS

The all-new Federal[®] Fusion[®] Tipped design offers the same great terminal performance as the original bonded soft points but with a polymer tip that increases ballistic coefficient, flattens trajectories, and boosts energy for better accuracy and extended effective range. Available in nine offerings ranging from 300 Blackout to 300 Win. Mag.

TERMINAL ASCENT[™]

NEW ADDITIONS: 7MM PRC 170-GR, 300 PRC 210-GR

The bonded construction of Federal Premium[®] Terminal Ascent penetrates deep on close targets, while the patented Slipstream[®] polymer tip initiates expansion at extreme long range. The bullet's long, sleek profile offers an extremely high ballistic coefficient, and its AccuChannel[®] groove technology improves accuracy and minimizes drag.

ELD-X[®]

NEW ADDITIONS: 6.5 PRC 143-GR, 7MM PRC 175-GR

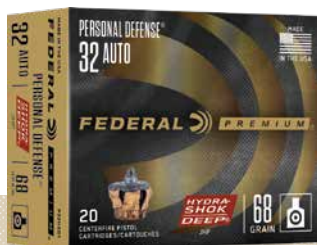

Federal Premium ammunition loaded with ELD-X bullets delivers tag-filling terminal performance. The match-accurate, hard-hitting hunting projectile features an extremely high ballistic coefficient and a design that provides dynamic expansion at a wide range of velocities.

HAMMERDOWN[™]

NEW ADDITION: 360 BUCKHAMMER 220-GR

Velocities of Federal Premium HammerDown loads are customized to produce superior ballistics and terminal performance through lever-action rifle barrel lengths. The construction of the molecularly bonded soft point bullets has also been adjusted for the best accuracy and expansion at those velocities.

PERSONAL DEFENSE[®] HYDRA-SHOK[®] DEEP[™]

NEW ADDITION: 32 AUTO 68-GR

We're giving the classic 32 Auto defensive cartridge a new life thanks to the most modern bullet technology. New Hydra-Shok Deep 32 Auto maximizes the cartridge's available energy to deliver critical penetration through bare ballistics gelatin and heavy clothing.

PERSONAL DEFENSE[®] PUNCH[™]

NEW ADDITION: 25 AUTO 45-GR SOLID

Get the most from any cartridge. Like all Punch offerings, our new 25 Auto is designed around the unique properties of the specific cartridge to provide caliber-optimized terminal performance. To that end, it features a deep-penetrating solid bullet design.

CHAMPION™ HANDGUN

THREE NEW ADDITIONS

Federal® Champion handgun loads provide accurate, target-grade performance. They're loaded with quality brass and primers and are affordably priced for volume shooters. New additions include 30 Super Carry 90-grain, 380 Auto 95-grain, and 38 Special 130-grain.

CHAMPION VALUE PACK 22 LR

NEW ADDITIONS: 38-GR HP 525- & 325-COUNT

Whatever their rimfire pursuit might be, shooters will get accurate, affordable performance with Federal Champion rimfire ammunition. Reliable bullets, priming and brass are suited to a wide variety of rimfire range applications.

ULTRA™ STEEL

NEW PRODUCT LINE: EIGHT LOADS

Federal Premium® Ultra Steel features the rear-opening FLITECONTROL FLEX wad and a payload of zinc-plated steel. These 3-inch loads are available in a variety of standard payloads, as well as loads that feature two sizes of shot: smaller pellets that create full patterns combined with larger ones that deliver better lethality.

PRAIRIE STORM® BISMUTH BLEND

NEW PRODUCT LINE: SIX LOADS

These upland loads feature Prairie Storm's FLITECONTROL FLEX® wad and Premium® steel shot, No. 3 or 4, with the added performance boost of HEVI-Bismuth™ pellets, No. 5 or 6, alloyed and cast in Sweet Home, Oregon. Available in a total of six 12- and 20-gauge offerings.

FREIGHT TRAIN™ COPPER

NEW PRODUCT LINE: FOUR LOADS

This is an all-new lineup of tipped slugs in 12- and 20-gauge, and 2 3/4- or 3-inch. The load's streamlined copper projectile and exclusive sabot design combine to print excellent groups at 200 yards through rifled barrels. A polymer tip and aerodynamic nose profile maximize downrange energy, while the externally skived nose cavity provides dramatic expansion.

HI-BIRD® FIBER WAD BISMUTH

NEW PRODUCT LINE: 12-GA NO. 5

These shotshells feature the same cellulose over-powder wad technology as original Hi-Bird Fiber Wad, but with a payload of 9.6 g/cc bismuth to meet non-toxic requirements. The pellets are 22 percent denser than steel, delivering more energy downrange, and the cellulose over-powder wad minimizes plastic left in the field.

ACTION SHOTGUN™

NEW PRODUCT LINE: 12-GA NO. 7.5

Designed for fast-paced competitions, these loads feature a rigid roll crimp that improves cycling through both tube- and magazine-fed shotguns. The 1 1/8-ounce payload of high-quality No. 7.5 lead pellets is pushed out the muzzle at 1,235 fps, delivering impressive knockdown power on steel targets. Available in convenient 200-round bulk cases.

HEAVYWEIGHT® TSS TURKEY

NEW ADDITION: .410 NO. 7

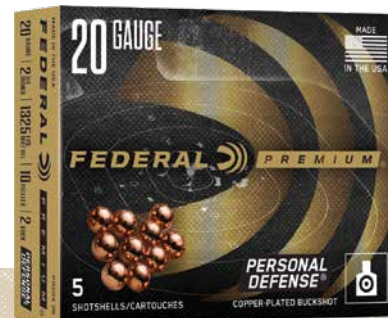

The tungsten-alloy shot material's 18 g/cc density is 56 percent more than lead, resulting in the highest pellet counts and the most energy at extreme range.

PRAIRIE STORM® FS LEAD

FOUR NEW ADDITIONS

These trusted upland loads utilize the rear-opening FLITECONTROL FLEX® wad and a mixed payload of standard pellets and FLITESTOPPER® lead to produce full, consistent patterns through any choke. New additions include 12-gauge, 2 3/4-inch magnum (1,330 fps) loads in shot sizes 4, 5, or 6, and 28-gauge, 3-inch, 1-ounce No. 6.

PERSONAL DEFENSE® SHOTSHELL

NEW ADDITION: 20-GA 2B WITH FLITECONTROL™

Federal Premium® buckshot loads featuring the rear-braking FLITECONTROL™ wad provide superior patterns to better protect you and your family. Their specialized payloads produce penetration fine-tuned to the needs of self-defense situations.

GOLD MEDAL® PAPER

NEW ADDITIONS: FITASC 12-GA NO. 7.5 & 8

These paper shotshells feature a 1-ounce payload that's optimized for international FITASC competition. Like all Gold Medal Paper loads, they feature a high-quality brass head, harder shot, and two-piece SoftCell™ wad design that reduces felt recoil and improves patterns.

BAGS, POUCHES & CASES

PREMIUM, FIELD & RANGE, AND TOP GUN

Designed by hunters and shooters for the range, field and blind, Federal's new accessories include a full line of gun cases, shell pouches and range bags. Built for convenience, protection and accessibility, there are several styles available in each product category to fulfill various needs and price points.

Remington®

PREMIER® ACCUTIP MZ

NEW PRODUCT LINE: 50-CAL 260-GR SABOT

These bonded, sabot muzzleloader bullets hit hard and load easy. Using the patented PowerPort™ Tip, they deliver a high ballistic coefficient, accuracy, and flat trajectories.

PREMIER CuT

NEW PRODUCT LINE: NINE LOADS

This monolithic copper alloy bullet delivers accuracy and terminal performance. Its precision tip gives it a high BC and flat trajectories with instant expansion and energy transfer on impact. Its tough copper alloy bullet touts 95 percent weight retention and features optimized grooves to maximize aerodynamic performance. Available in nine offerings ranging from 7mm Rem. Mag. to 300 PRC.

CORE-LOKT® TIPPED

FIVE NEW ADDITIONS

Core-Lokt Tipped combines truer flight, flatter trajectory and devastating terminal energy. Big Green's polymer tip improves long-range ballistics, in-flight accuracy, and initiates rapid expansion. Its proven Core-Lokt jacket is tuned for optimal performance. The new product line additions are 360 Buckhammer 180-grain, 7mm-08 140-grain, 6.5 PRC 140-grain, 7mm PRC 175-grain, and 300 PRC 210-grain.

CORE-LOKT COPPER

NEW ADDITION: 360 BUCKHAMMER 180-GR

The performance you've come to know and expect from Core-Lokt is now available with an all-copper bullet. The lead-free projectile is made from high-strength copper like classic Core-Lokt's proven jacket. The precision hollow point delivers consistent, deadly expansion and performance on-game, across a wild range of velocities.

UMC LEADLESS™

NEW ADDITIONS: 9MM & 223 REM

Re-engineered and retooled, UMC Leadless features a generation of specially improved, non-lead bullets ready for any shooting range. Catalyst™ clean priming technology eliminates lead exposure at the firing line, while copper jacketed compressed core projectiles reduce splash back from steel targets near or far.

CORE-LOKT HANDGUN

NEW PRODUCT LINE: FOUR LOADS

Classic Core-Lokt projectiles deliver superior two-times expansion, high weight retention and deep penetration with a unique hollow-point design. Premier nickel-plated cases deliver smooth, reliable, flawless function in any type of hunting handgun or revolver. Available in 357 Magnum, 41 Magnum, 44 Magnum and 10mm Auto.

HIGH TERMINAL PERFORMANCE™

NEW ADDITION: 32 H&R MAGNUM

These powerful loads are manufactured using first-quality brass cases, high-grade propellants and Kleanbore priming. HTP bullet styles are engineered for high weight retention and double diameter expansion.

PERFORMANCE WHEELGUN™

NEW ADDITION: 32 H&R MAGNUM

These popular loads are engineered for revolvers and lever-action rifles. They're made with high-quality components and Remington's Kleanbore priming that will not rust or corrode barrels. Available in traditional revolver and lever-gun rifle bullet styles for competitive and target shooting applications.

Remington®

22 GOLDEN HUNTER

NEW PRODUCT LINE: 22 LR 40-GR HP

Golden Hunter 22 LR reliably expands on target. The 40-grain hollow-point projectile penetrates to optimal depths while performing in any barrel length at common hunting distances, making it ideal for rifles or pistols. Available in 100- or 550-round cartons.

RANCH HAND 22 LR

NEW PRODUCT LINE: TWO LOADS

Ranch Hand's copper-plated projectiles are available in a 38-grain hollow point or 40-grain round nose. Remington's improved rimfire manufacturing and priming technology ensure consistent high quality, consistency, accuracy and on-target performance with reliable ignition and longer life for gun barrels.

NITRO STEEL DUPLEX

NEW PRODUCT LINE: FOUR LOADS

Loaded with two different sizes of steel shot for ultimate performance at all ranges, these blended, high velocity magnum steel payloads deliver dense patterns. The smaller shot size is ideal for close up, while the larger shot maintains more energy at longer ranges. The 12-gauge, 3-inch, 1 1/4-ounce, 1450 fps, dual-shot size options are 2x4, 2x6, BBx2, and BBx4.

NITRO PIGEON

NEW PRODUCT LINE: 12-GA, 2 3/4", 1 1/4 OZ. NO. 7.5 1230 FPS

These loads are specifically engineered to accurately take down fast-rising doves and pigeons. They feature Remington's highest quality magnum-grade copper-plated hard-lead shot, a special propellant blend for consistent high velocity, and Remington's Premier Unibody hull.

LOW DECIBEL

NEW PRODUCT LINE: .410, 2 3/4", 3/4 OZ. NO. 9 550 FPS

With a muzzle velocity of only 550 fps, recoil and noise are greatly reduced without sacrificing dense, clay-busting patterns downrange. Low Decibel loads are precisely charged using uniform shot with optimal hardness and are very pleasant to shoot.

PREMIER' NITRO SPORTING CLAYS

NEW ADDITION: 12-GA NO. 7.5

These target loads have become a fixture on the nation's trap, skeet, and sporting clays ranges. Their unique gold hull has earned a reputation as one of the most reloader-friendly on the market. The new offering is a 12-gauge, 1-ounce, No. 7.5, 1,290 fps load.

BAGS, POUCHES & CASES

PREMIER, FIRST IN THE FIELD, AND GUN CLUB

Designed by hunters and shooters for the range, field and blind, Remington's new accessories include a full line of gun cases, shell pouches and range bags. Built for convenience, protection and accessibility, there are several styles available in each product category to fulfill various needs and price points.

BULLET KNIFE

LIMITED EDITION WATERFOWLER

Celebrate the annual tradition of Remington's iconic Bullet Knife. This American-made, collectible pocketknife features a 1095 Carbon Steel Clip point, long Spey partially serrated blades, a birding gut hook, and the famous nickel silver Bullet Shield, inlaid in a genuine jigged bone handle.

UPPERCUT™

NEW PRODUCT LINE: 22 LR 32-GR JHP

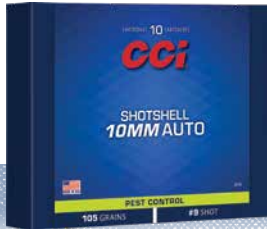

Uppercut's jacketed hollow-point bullet features nose skiving that initiates full and reliable expansion through semi-automatic handguns with 2.5- to 4-inch barrels. The design retains the weight needed to hit critical penetration depths, and CCI's legendary priming ensures it will always be ready when needed.

HEVI-BISMUTH™ PEST CONTROL SHOTSHELL

NEW PRODUCT LINE: SIX LOADS

These centerfire handgun shotshells are loaded with the Catalyst™ lead-free primer and HEVI-Bismuth pellets. At 9.6 g/cc, the shot carries nearly the same density and downrange energy of lead but adheres to all non-toxic ammunition requirements. Available in 9mm Luger, 38/357 Mag., 40 S&W, 44 Spl/Rem Mag., 45 Auto, and 45 Colt.

PEST CONTROL SHOTSHELL

NEW ADDITION: 10MM AUTO 105-GR NO. 9

The loads produce consistent patterns that make it easier to knock down nasty critters such as snakes and other pests in tight quarters. Packed in reusable boxes of 10 shotshells.

BLAZER® BRASS

NEW ADDITION: 9MM LUGER 100-GR FMJ

Blazer® Brass handgun ammunition features reloadable brass cases, quality primers, and clean-burning propellants. The new lower-recoil, 100-grain 9mm Luger load offers consistent, accurate performance for target shooting.

HEVI-XII®

NEW ADDITION: .410 NO. 5 & 7

Loaded with HEVI-Shot's original 12 g/cc tungsten that's 53.8 percent denser than steel, these loads double the downrange energy, hitting birds harder from a longer distance. This means you can drop three shot sizes for the same lethality and still put 28 percent more pellets on target.

HEVI-METAL XTREME

NEW ADDITION: 12-GA NO. 2/BB

This new loading devotes 30 percent of the payload to HEVI-Shot 12 g/cc tungsten pellets (No. 2) and stack them over steel shot (BB). It also features the FLITECONTROL FLEX wad for consistent long-range patterns and is pushed at high velocities.

HEVI-STEEL® UPLAND

NEW PRODUCT LINE: TWO LOADS

These 12-gauge dove and quail loads feature 7.8 g/cc precision steel pellets in No. 6 or 7, dependable ignition, and a unique HEVI-Shot® wad to produce exceptionally tight patterns. Their high velocity provides more downrange energy.
