

 **SAVAGE**[®]

2023 MODEL OVERVIEW

BETTER COMES STANDARD

As one of the worlds largest manufacturers of rifles and shotguns dedicated to hunting, shooting, competition, and fun at the range, Savage Arms is committed to constantly looking ahead, finding new ways to push performance ever higher. We've set the industry standard for out-of-the-box accuracy with high performance firearms. And in 2023 we're holding ourselves accountable to accomplish this yet again with our 2023 lineup of new firearms. **Here's a look at what we have in store.**

SAVAGE 1911

After more than a century of evolution, John Moses Browning's venerable single-action semi-auto is still standing strong. The gun that beat the Savage Model 1907 to become the US Military's M1911 is now being given the Savage treatment. The Savage 1911 is built from stainless steel and has a dual recoil spring and machined sear and disconnecter. While the look pays homage to the original, the Savage 1911 is built to work. From its nitride coated titanium firing pin, to the target crown on the barrel, this 1911 delivers accuracy and reliability. **This is Savage.**

- Forged stainless steel frame and slide
- 5" Stainless Steel Barrel machined from billet with 11° target crown
- Dual recoil spring system with GI-style guide rod and barrel bushing
- Ejection port is lowered, flared, and cut for live round ejection
- Nitride-coated titanium firing pin
- Fully machined, tool steel sear and disconnecter and stainless-steel hammer
- Novak® Sights
- Ambidextrous Safety Lock
- VZ G10 Grips
- Includes (2) magazines and hard case for protection
- Optional Picatinny Rail on Certain Models
- Original 1911 Style Firing System Models

IMPULSE

WELCOME TO AMERICAN STRAIGHT-PULL. BUILT FOR SPEED. BUILT FOR ACCURACY.

Experience the natural feel, lightning-fast speed and exceptional accuracy of the all-new IMPULSE. Built here and engineered for the demands of the American shooter—straight-pull action combines the confidence and accuracy of a traditional bolt with the speed of a semi-automatic. The pure movement allows for faster follow-up shots with quicker target reacquisition for instinctive, repeatable accuracy.

- Straight-pull rifle
- AccuStock® with AccuFit® adjustable length-of-pull and comb height
- User-adjustable AccuTrigger®
- Proven four-bolt barrel clamp with integral lock provides easy disassembly and repeatable zero.
- Self-contained Modular Subassemblies enable simple tool-less disassembly and assembly
- Rotary Bolt Handle allows for controlled loading, leveraged bolt close, and pre-extraction.
- Camo or Green Synthetic stock
- MDT 1-piece aluminum ACC chassis with fully adjustable length-of-pull and comb height (Elite Precision model only)
- Threaded barrel (5/8-24")
- Round knob ambidextrous bolt handle
- Detachable box magazine
- 1-Piece 20 MOA rail machined into the aluminum receiver

IMPULSE MOUNTAIN HUNTER

Savage is taking innovation and accuracy to new heights at faster speeds with the Impulse Mountain Hunter. With its exclusive Proof Research carbon fiber wrapped stainless steel barrel and rugged polymer frame, the Impulse can achieve lighter weights for higher altitude hunts and longer treks for big game. Every inch of the Impulse rifle encompasses breakthrough technology for repeat accuracy and enhanced safety. The straight pull action provides quick follow-up shots and the ability to stay on target in a high-adrenaline hunting scenario.

- Proof Research carbon fiber wrapped stainless steel barrel with threaded muzzle (5/8-24)
- Ambidextrous, removable, multi-positional bolt handle.
- User-adjustable AccuTrigger (1.5-4 lbs)
- AccuStock with AccuFit technology
- Available in 7mm PRC

110 CARBON PREDATOR

Turning the tables on nature's predators requires tools that can withstand the elements and perform when it matters. The 110 Carbon Predator features details that make a difference when every shot count. The user-adjustable AccuTrigger can be adjusted by the shooter down to 1.5 pounds while the granite textured stock features AccuFit with AccuStock, which secures the action three-dimensionally along its entire length. The rifle is paired with a carbon fiber wrapped stainless steel barrel, and AICS detachable magazine to ensure optimum performance.

- Exclusive PROOF Research Carbon Fiber Wrapped Stainless Steel Cut Rifled Barrel with threaded muzzle
- AccuStock with AccuFit technology with granite texture
- User-adjustable AccuTrigger (1.5-4 lbs)

NEW CALIBER

7MM PRC

The new cartridge from Hornady® puts an emphasis on being able to utilize today's long, high BC bullets for standard long action rifles and utilizes the same design methodology as the 6.5 Creedmoor, resulting in excellent and repeatable accuracy performance. The 7mm PRC is a match accurate cartridge that has an appropriate twist rate for modern, high BC bullets along with a cartridge case that is optimal for today's temperature stable powder, resulting in the ultimate in ballistic consistency. Where current overbore magnums suffer from long cartridge cases and short COL limitations, the 7mm PRC addresses this shortfall in order to not compromise accuracy. Paired with Savage's heritage for proven accuracy, these rifles are designed for performance with the new 7mm PRC.

7MM PRC MODELS

STEVENS 555 SPORTING

The Stevens over/under line-up is adding value to the sporting clays and trap leagues with the new 555 Sporting model. Its lightweight aluminum alloy receiver is scaled to gauge and incorporates a steel insert that reinforces the breech, minimizing weight and maximizing strength. Added features like a raised ventilated rib with mid-bead and front fiberoptic sight give shooters a competitive advantage and the adjustable cheek riser accommodates any framed shooter at a price that's unmatched among comparable models.

- 3" Chamber O/U 12 Gauge Shotgun
- 30" Ported Barrels for recoil reduction
- Lightweight Aluminum Alloy Silver Receiver
- Turkish Walnut Stock & Fore-end with adjustable comb height and 14.5" length-of-pull
- Raised ventilated rib with mid-bead rear sight and fiberoptic front sight

STEVENS 334 RIFLE

Where value and performance meet, is where the Stevens Model 334 bolt action rifle excels. The rifle features a 2 stage adjustable trigger and a 60-degree bolt lift to allow faster loading on follow-up shots. The barrel is free-floating and button rifled for consistent accuracy. Offered in three popular calibers, the Stevens Model 334 is available in a Turkish Walnut stock option with a silver bolt or a black synthetic stock with a matte black action to match.

- 3-Position Safety
- 2 Stage Adjustable Trigger
- 60 Degree Bolt Lift with 3-Locking Lugs
- Ergonomic Stock and Recoil Pad
- Matte Black Synthetic Stock or Turkish Walnut Stock Options
- 3-Round Detachable Box Magazine
- Matte Black Carbon Steel Receiver with Integrated Recoil Lug
- Drilled & Tapped Receiver (Savage M110 Spacing) with Steel MIL-STD 1913 Picatinny Rail
- Free-floating, Button Rifled, Carbon Steel Barrel with 11° Target Crown
- 2-Sling Swivel Studs

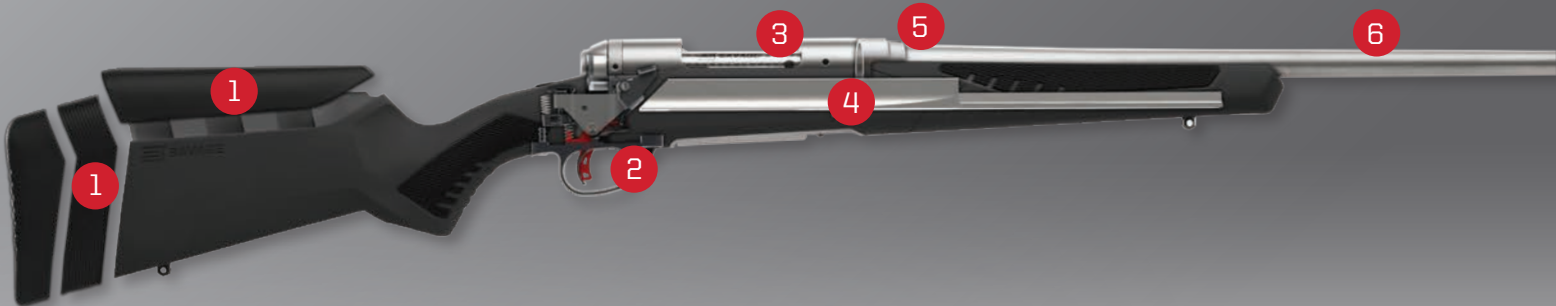

// 334 SYNTHETIC

// 334 WALNUT

SAVAGE INNOVATION

1. ACCUFIT™

We all know proper fit of a rifle is key to repeatable accuracy. The Savage AccuFit system allows for easy adjustment to length of pull and comb riser height. Five different comb risers allow you to set the perfect height for your size, optic height and shooting preference. Four stock inserts ensure the proper length of pull so the firearm truly fits you.

NOTE: AccuTrigger™ is shown red for emphasis. Actual color is silver. For more information, see video at: savagearms.com

2. ACCUTRIGGER™

Savage's AccuTrigger™ is the standard by which all factory triggers are judged. The system is easily adjustable, offers a light, clean pull with no creep, and prevents the firearm from discharging if jarred or dropped. Shooters can set the trigger pull to their preferences without having to pay a gunsmith. The AccuTrigger cannot accidentally discharge during normal use. While the trigger is being pulled, the integrated AccuRelease is intentionally depressed, which unblocks the sear and allows the rifle to fire.

3. FLOATING BOLT HEAD

Savage's floating bolt head adjusts itself for a perfect fit. By moving just a few thousandths of an inch, the head aligns with the bolt face, cartridge, and chamber.

4. ACCUSTOCK™ BEDDING

When a cartridge fires, harmonic waves travel the length of the barrel. This movement affects how the bullet travels. Repeatable accuracy requires a firmly bedded action. The Savage AccuStock embeds a rigid rail system in the stock throughout the fore-end. Rather than connecting the action to the stock with one or two screws, the AccuStock engages the action along its entire length.

5. HEADSPACE CONTROL

At Savage, we set headspace by carefully threading barrels into place with their matched actions and bolts. This hand-fit, zero-tolerance process results in a perfectly-matched set that is then locked in with a barrel locknut.

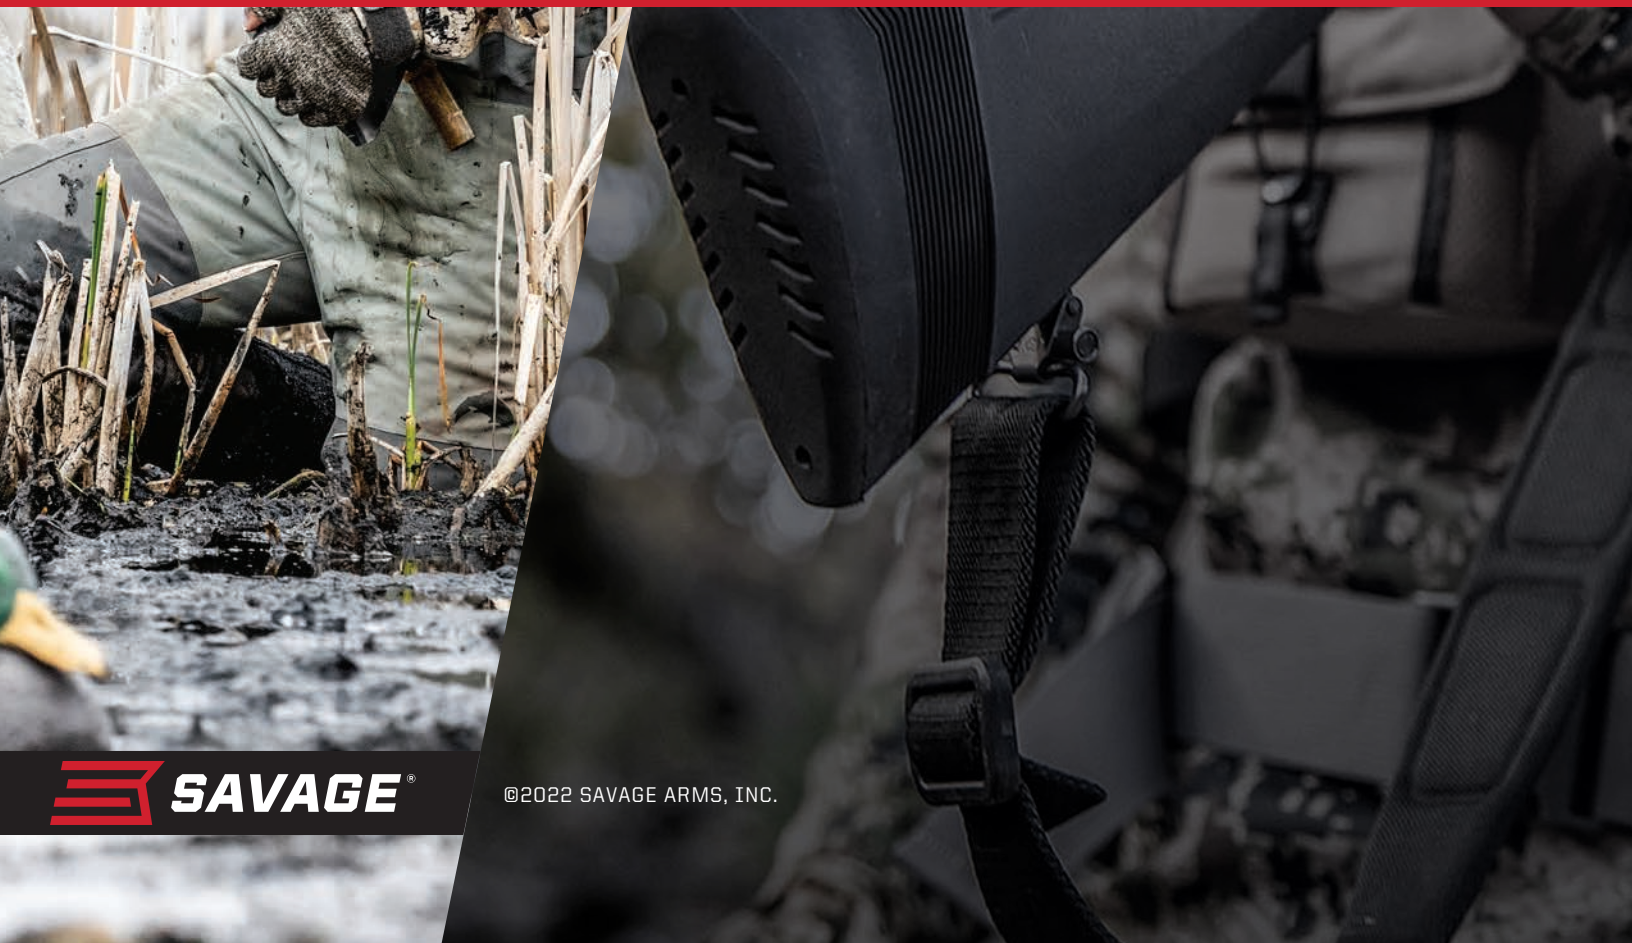

6. PRECISION BUTTON RIFLED BARRELS

Accurate barrels require specialized machinery and experienced operators. Savage proudly employs both. Savage's centerfire barrels—from the Team Savage competitor's F Class rifle to the one going on your kid's first deer rifle — are checked and, if needed, hand straightened by the same skilled craftsman.
