*2026 MODEL OVERVIEW*

**NEW**

**SAVAGE**  
**MODEL 110**

# THE LEGEND REBORN

After nearly 70 years of trusted performance, our 110 family is getting its most significant update yet—inside and out. Internally, we've re-engineered the ultralite components for improved reliability, efficiency, and performance, refining features that matter to consumers while honoring its original strengths. Visually, the product now sports a refined, upgraded look that maintains its classic identity but with consumer demanded features. This update marks a bold new chapter while staying true to what made it iconic in the first place.

# 110 RF

The all new 110 RF brings 22LR into a full-size platform. Built off the proven 110 action, these new models are designed to perform. Like its big brother, all 110 RF models will be capable of using stocks or accessories designed for a Savage 110 short action firearm. The bolt has been designed with the same headspace control that the 110 is known for. The unique front baffle allows the user to interchange the length of bolt throw. It can be configured for a standard 308 Win length throw or shortened to just a 22LR length throw. This enables the user to cycle the bolt faster with the 22LR length throw or use it to train with the full-length bolt throw just like a 308 Win. Feeding from a 10 round AICS style magazine, the 110 RF's match grade chamber will ensure optimum accuracy shot after shot.

Full Size 110 Action // AICS Style Magazines // Cerakoted Actions

// **110 RF CORE TACTICAL**

// **110 RF MAGPUL**

// **110 RF ELITE PRECISION**
